WATER QUALITY TREATMENT, ASSOCIATE OF APPLIED SCIENCE

The Water Quality Technology, AAS degree includes five introductory courses in water and wastewater operations, 24-credit hours of related cooperative work, and foundational courses including math, science, and STEM elective courses. The coursework will help prepare for the Level 1 Certification exams. The cooperative work experience is hands on training and is equivalent to approximately 5 months full-time work experience.

PROGRAM STUDENT LEARNING OUTCOMES

- Define the terms and concepts along with the necessary mathematical skills required to pass the Level I water and wastewater certification examinations
- Describe the maintenance and operation of water treatment, water distribution, wastewater treatment, and wastewater collection systems, related to the operator's job
- Describe laboratory sampling and testing methods approved by regulatory agencies to evaluate water quality and treatment process performance
- Evaluate laboratory analyses and measurements, culminating in the interpreting and reporting or results against industry standards
- Model quantitative water an wastewater relationships using mathematics, equations, and graphs to interpret individual situations and determine plans of action using appropriate industry protocol

Math and writing placement are unique to each student and are determined during the admissions and intake advising process. Additional math or writing courses may be required prior to taking the math or writing program requirements in this degree.
