

DIESEL MECHANIC TECHNOLOGY, ASSOCIATE OF APPLIED SCIENCE

⁵ PE231, HE250, or three (3) credits of PE185 sport/activity courses will satisfy this requirement.

The diesel technician repairs and maintains diesel powered trucks, marine, logging and agricultural equipment and their support systems. This program is designed to prepare students for entry-level positions in diesel service technology. Training is varied to give students a broad understanding and background in different phases of the diesel service industry. It is an industry-specific two year associate degree program. It is designed to prepare individuals to become qualified diesel service technicians. Students learn how to work on many types of diesel equipment including semi-truck, construction, forestry, marine, and agricultural equipment. Students learn about engine fundamentals, machine hydraulics, fuel systems, electrical systems, transmissions, air brakes, undercarriage, final drives, and more.
